[Check out The Social-Engineer.org Podcast](#)

Oct 14 2009

Filed In: [social engineering](#)

I just finished listening to the first episode of The Social-Engineer.org Podcast, hosted by Chris, Mati, Jim, and Dave over at the relatively new [social-engineer.org](#). The podcast has been available for nearly two weeks now, and I had been looking forward to listening to it once I finished the audiobook of The Lost Symbol. The first episode, titled “Interview and Interrogation Tactics” is really great and I recommend that you check it out:

- [Episode 001 – Interrogation and Interview Tactics](#)

The podcast, along with the rest of their site, is a really informative and discussion of social engineering beyond simply lying and immature tricks. I’m looking forward to future episodes and I hope they move to a more frequent schedule!
